DETAILED ACTION**Election/Restrictions**

This application contains claims directed to the following patentably distinct species of the claimed invention: there are numerous sequences of peptide ligands listed in claims 1-20, and DNA encoding such (claims 33-38). Each has a distinct structure and function from the others, and each requires a separate search of the prior art.

Applicant is required under 35 U.S.C. 121 to elect a single ultimate disclosed species of peptide, and specify the single amino acid sequence, and the DNA encoding such by a SEQ ID NO for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic. Further, each residue of the elected sequence must be identified with a specific amino acid (not Xaa).

Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. § 806.05 for inventive groups that are directed to *different* products, restriction is deemed to be proper because these products constitute patentably distinct inventions for the following reasons. Each of the peptide or DNA molecules has a unique sequence, requiring a unique search of the prior art. Searching all of the sequences in a single patent application would provide an undue search burden on the examiner, and the USPTO's resources because of the non-coextensive nature of these searches.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
